## 4th Grade Science Fair

I found 5 extraordinary samples, but forgot exactly which ones they were...  
I remember these things about them though:

The first sample was the only multicolor sample.

The second was a mix of the colors surrounding it to the left and right.

The third was twice as full as the tube on its right, and half as full as the tube on its left.

The fourth tube was the only one with that much volume inside.

The fifth was unstable and seemed dangerous.
